# Press Release

• For Immediate Release: October 22, 2008

Haggan Aviation in Colorado has increased AOG support capabilities for the busy winter season.

Englewood, CO – Haggan Aviation has added 2 Technicians to increase our AOG support capabilities for the busy winter season in the Colorado resort airports.

Haggan Aviation has a dedicated support van set up to travel to Eagle, Aspen, Craig, Telluride and all Colorado locations. We can be at any of these airports within a few hours to service any turbine aircraft AOG issues. This service is available 7 days a week.

*For more information please contact - Jeff Graser V.P. Sales - Haggan Aviation (303) 792-0688*

continues

Haggan Aviation is located at Centennial Airport just south of Denver, CO.

Since 1996 Haggan Aviation has been servicing turbine corporate aircraft specializing in heavy maintenance on Lear Jet, Hawker, Westwind Citation and Beech Jet (Hawker 400). All 30 mechanics are factory or flight safety trained. We operate 2 shifts, 7 days a week.

Haggan Aviation is an authorized TFE731 line service center as well as Honeywell, Rockwell Collins, Universal Avionics, Chelton, Shadin, AirCell and Flight Display Systems.

Haggan Aviation is a member of the NBAA and the AEA.

We take pride in providing the best possible customer service and value in corporate aviation.
